Interests

Football, basketball, skiing, gym, traveling

Languages

I am an inquisitive, enthusiastic software developer who recently graduated from CodeClan's professional software development course. Throughout the course I developed strong programming skills with a particular focus on web development, as well as soft skills such as collaboration, communication, and creativity. I am looking forward to beginning my career as a software developer and joining Scotland's thriving tech industry.

Education

May 2018 - Sep 2018	CodeClan Achieved an SQA Level 8 Qualification in Software Development at CodeClan's 16-week intensive course, involving 800+ hours of class time and personal study. The course focused on Object Orientated Programming (Ruby, Java, JavaScript), web development and test-driven development. It involved daily pair programming labs as well as three web application projects.
Sep 2013 - May 2017	Heriot Watt University 1st Class BSc. (Honours) Psychology <ul style="list-style-type: none">A high level understanding of psychological theory, with focus on social psychology, cognitive psychology, developmental psychology, neuroscience, and research methods.Various elective modules in marketing and business management.

Projects

- Spending Tracker:** A web application built using Ruby and Sinatra to allow users to track financial transactions, and break down their spending habits by date, merchant, and tag.
- News Website:** A web application built using Java and Spark. Users can view a homepage with all articles, click through to see full stories, view journalists, and share on social media. An editor side also allows the creation, edit, and deletion of articles.
- Event Finder:** A single page web application built using vanilla JavaScript that makes use of external APIs. Users are able to search for events based on category, dates, and location and can then view their results on an interactive map.

Experience

Jul 2017 - Sep 2017	Driver/Build Team Member <i>Out of Hand</i> Responsibilities included building and maintaining structures used for Edinburgh Festival advertising, driving and delivering heavy loads in vans, and using basic handyman skills.
Jun 2016 - Sep 2016	Customer Assistant <i>Margiotta Food and Wine</i> Responsibilities included operating the till, handling cash, assisting and serving customers, handling deliveries, and pricing and sorting stock.
Jun 2015 - Nov 2015	Bartender <i>Platform 5</i> Responsibilities included daily running of the bar area, serving drinks to customers, handling cash, working as part of a large team of staff, and controlling stock levels.
